

**COURSE DESCRIPTION: Smell It Like It Is** Oral malodor, also known as halitosis, is a condition that has been recognized since ancient times. It is a valid concern affecting millions of individuals. Americans spend over 2 billion dollars annually for fresher breath. Dental professionals are in an ideal position to offer solutions for an embarrassing problem. This course will assist the dental professional in addressing halitosis. In addition, it will empower the clinician to have courageous conversations and recommend various solutions to address halitosis.

**COURSE OBJECTIVES:**

- Differentiate between the classifications of halitosis.
- Recognize the sources of halitosis.
- Identify and recommend solutions for the prevention and treatment of halitosis.

**COURSE DESCRIPTION: If you DON'T Snooze, You Lose** As co-therapists in multidisciplinary treatment, dental professionals have the opportunity to play a significant role in changing the path of an individual's life. Routine screenings are a vitally important component to any comprehensive treatment plan. Optimal patient care has expanded to include screenings we have not considered in the past. Screening for Sleep Disordered Breathing is no exception. Emerging research on Sleep Disordered Breathing (SDB) and the far-reaching health effects for an individual, underscores the need to elevate our knowledge and embrace the value of our role in early discovery. Sleep Disordered Breathing is a global issue that knows no boundaries, be it socioeconomic, gender, race or age. This course will assist the dental professional in developing the fundamental knowledge for Sleep Disordered Breathing to confidently screen, discuss, refer and help manage the SDB patient(s).

**COURSE OBJECTIVES:**

- Identify various forms of Sleep Disordered Breathing.
- Assess the risks associated with SDB at various stages in life.
- Evaluate oral/systemic challenges with the SDB patient.
- Recognize the dental professional's role in the pathway of referral and management of SDB.

**Danette Ocegueda, RDH, MS**  
Danette received her Bachelor of Science degree in Dental Hygiene from Old Dominion University, her Master of Science in Dental Hygiene Education for the University of Missouri-Kansas City. Danette is the Professional Educator for West region for Philips Oral Healthcare. In addition to over twenty-seven years of clinical experience, Danette's career also includes experience in academia, research, public speaking and Forensic Dentistry.
